

## Plum Brook Decommissioning Program Office (QD)

The PBRF Decommissioning Project Office (PO) provides general and specific management and planning, safety, environmental engineering, and technical oversight for the PBRF Decommissioning Project. A team of experts and contractors supports the Project and various Glenn Research Center (GRC) offices also provide direct and indirect support. The Decommissioning team consists of the NASA-GRC Decommissioning Project Office and its support contractors, prime and sub-contractors, and also includes resources provided by other GRC organizations and the Department of Energy - Argonne National Laboratory (DOE-ANL). Other GRC-SMA organizations that support the Decommissioning Project Office include the Code QE/ Safety, Quality, and Reliability Division (SSQRD) and Code QS/Safety, Health and Environmental Division (SHED) which provide support in Risk Management, Quality Management, Safety, and Environmental Management. Additional GRC support is provided by the Glenn Resources Analysis & Management, Facility Engineering, and Community & Media Relations organizations. Direct Support Contractor and Consultant services are provided for Community Relations (*Focus Group*), and Station Safety, Administrative, and Health Physics Services (the Plum Brook Operations Support Group [PBOSG]), among others.
