

NASA GLENN RESEARCH CENTER AT LEWIS FIELD

06/99

The Organization Manual was developed to provide a centralized source of information regarding the various organizational elements of the Glenn Research Center. This document contains a Center organization chart as well as organization charts for each Directorate/Staff Office and subordinate organizations. The manual includes functional statements for each organization to the branch/office level. These functional statements give a brief narrative on the various organizational missions, roles and responsibilities.

In order to access the Center organization chart go to the Directory and click on GRC. You may also access all Directorates and Staff Offices by clicking on the appropriate organization code. Once you have accessed the Directorate/Staff Office, click on the Division/Office for the charts that reflect those organizations. Clicking on the organizations will also allow you to read the functional statement for that organization.

Additionally, the Organization Manual contains biographies on John H. Glenn and George W. Lewis that can be viewed by clicking on their respective pictures located on the manual cover.

Additional information about organization activities may be obtained from their organization's web pages listed on [Glenn Research Center Organizations On-Line Page](#)
