

Sample Paper Title: Instructions for SPRAT XXII Poster Session Abstracts

Sample Author #1, Author Affiliation

Sample Author #2, Author Affiliation

In order to ensure the proper evaluation of posters submitted to the 22nd Space Photovoltaic Research and Technology Conference, all authors are requested to submit a Publication Abstract. The Publication Abstract will be included in an abstract booklet handed out at the conference. The Publication Abstract is limited to one page and should follow the format used for these instructions. The Publication Abstract should include the poster title, all authors and their affiliation, body of the abstract, and the technical point of contact for further questions. It is recommended that justified Times 11 point font be used for the body, Times 14 point Bold for the paper title, with surrounding one-inch margins. The Publication Abstract should be submitted in a Microsoft Word or plain text format. While not encouraged, figures/pictures may be used in the Publication Abstract where suitable, as long as the one page limit is not exceeded (images will be printed in monotone).

Please e-mail all poster submissions to Barbara Madej at Barbara.H.Madej@nasa.gov. Note that the deadline for poster abstract submissions is August 5, 2011. Further information on the SPRAT conference may be obtained at the SPRAT website. <http://www.grc.nasa.gov/WWW/SPRAT/>.
