Dear Mr. Morton:

The Award Fee Evaluation Board for the Glenn Engineering and Scientific Support-2 (GESS-2) Contract NNC06BA07B met on November 29, 2007, for the purpose of determining fee awarded for the second evaluation period, which ran from April 1, 2007 through September 30, 2007.

The input from the Board indicates that your performance over the second period was excellent. Technical performance, as graded by the NASA Technical Representatives, was excellent with 181 of 182 Task Orders rated "Excellent" or "Very Good", and only one task order rated "Good." You also received "Excellent" ratings in the areas of cost control business management.

The numerical rating of technical performance, cost control, and business management factors resulted in a raw award fee score of 95.52 percent. The government team informs me that the areas of concern mentioned in the Award Fee Performance-1 (AFP-1) letter, namely corporate responsiveness and local Business Office autonomy, have been adequately addressed. Also, our Equal Opportunity Specialist tells us that your efforts are solid, and there are no areas of under-representation on the contract.

In consideration of these factors, I am raising your score to 96 percent of the total award fee pool of \$1,061,123 for a total award fee of \$1,018,678. I commend your efforts in all areas of performance, and extend the appreciation of the entire staff of Glenn Research Center for your contributions to our continued success.

While your achievement of cultural diversity goals has been good, I would encourage more minority recruitment sites be utilized in recruitment efforts by your corporate office. Also, I would like to see completion of the diversity training by your corporate office, which has been an open action item since contract inception. I would expect to see progress, if not complete resolution, of these issues by the end of AFP-3.

Finally, while corporate responsiveness has improved, I urge you to be vigilant and not allow the shared services concept to interfere with the excellent customer support you have achieved this period.

Sincerely,

Olga Gonzalez-Sanabria
