**Sample Statements from Attendees:**

This workshop provided good info and brought together folks to enable collaboration.

I feel the content and pace of the meeting was good!

The large amount of content on the research projects at GRC was very useful. I can use this info to convince my company to further collaborate with NASA.

Research efforts are well integrated and address critical issues.

**Some suggested areas of improvement:**

When the audience member speaks he/she should have access to a microphone.

A bulleted list of questions for industry to comment on specific research. This will standardize the feedback.

A tour of NASA facilities might be nice.
